

Automation & Data Integration

Marketing Data Automation · Reporting · Business Visibility

Structuring automated analytics workflows to reduce operational friction and improve business visibility.

FOCUS

Reporting
Automation

DATA · INTEGRATION ·
DECISIONS

CONTEXT

Marketing and analytics environments often struggle with fragmented visibility across CRM, campaigns, customer signals and performance reporting.

The challenge is rarely lack of data — but lack of structured visibility for business decisions.

RD Station · Google Analytics · Google Ads · Meta Ads · CRM · Supermetrics · Google Sheets · Executive Dashboards

CHALLENGE

Disconnected systems and repetitive reporting workflows created **operational friction, fragmented visibility and low scalability** across marketing and performance tracking.

- Manual operational effort for recurring reporting
- Fragmented visibility across marketing, CRM and campaign performance
- Limited visibility into funnel progression and business signals
- Low scalability in reporting and analytical routines
- Difficulty transforming multiple data sources into executive visibility

ARCHITECTURE

From fragmented sources to executive visibility.

ACTION TAKEN

Structured **automated analytics workflows** integrating marketing and business data into centralized reporting environments.

- Webhook-based integrations between RD Station and Google environments
- Automated ingestion and organization of lead, MQL and opportunity data
- Google Apps Script routines for recurring reporting automation
- Consolidation of campaign, CRM and performance signals into dashboard-ready datasets
- Structured visibility across marketing funnel stages and reporting layers
- Executive-oriented dashboards supporting business monitoring and decision support

BUSINESS IMPACT

- ✓ Reduced operational friction in recurring analytics workflows
- ✓ Faster business visibility across marketing and funnel performance
- ✓ Stronger reporting consistency and analytical standardization
- ✓ Increased scalability for recurring decision support
- ✓ Better executive visibility across customer and performance signals

KEY TAKEAWAY

Automation in analytics is not about technology first — it is about transforming fragmented signals into structured visibility for better business decisions.
